SHARE acknowledges local environment groups

SHARE (Sustainable Hepburn Association - Renewing the Earth) appreciate the work that our local environment groups do for the benefit of us all. Many of these environment groups continue with little funds and sometimes a small core group of people with a passion.

To mark World Environment Day, SHARE would like to work with our local environment groups to better understand what is happening and explore ways we could work together better.

If you are part of an environment group, involved in caring for our local environment or would like to be more involved please let us know by emailing info@hrea.org.au or calling 5476 4495.

An Open Forum about our local environment will be held on Thursday 4th June at Daylesford Neighbourhood Centre starting at 7pm.

SHARE is committed to sustainable communities and is the new common name for Hepburn Renewable Energy Association.

Regards,

Laurel Freeland

SHARE President

Daylesford
